

The Dashboarding Problem

Analytics team at Wikimedia Foundation

Goal:

**Easily Visualize
Editor Engagement
for **all** Wikimedia
projects**

Side Goal:

Explore
Dashboarding
Technologies

Date	project	pages	created
20140101	arwiki	50	
20140102	arwiki	40	
...			
20140101	dewiki	100	
20140102	dewiki	200	

Problem #1

Problem #1

Access to

Data

Everyone should
have access!

**Easily Visualize
Editor Engagement
for **all** Wikimedia
projects**

Problem #1

**Public Access
to Data**

Problem #2

Visualization

New post - Visualizing Algorithms - using
vision to study processes & systems.

bost.ocks.org/mike/algorithm... [#eyeo2014](#)

**Visualization is
an easier
problem than
data access**

This JavaScript...

```
new Dygraph(div, "ny-vs-sf.txt", {  
  legend: 'always',  
  title: 'NYC vs. SF',  
  showRoller: true,  
  rollPeriod: 14,  
  customBars: true,  
  ylabel: 'Temperature (F)',  
});
```

...makes this chart!

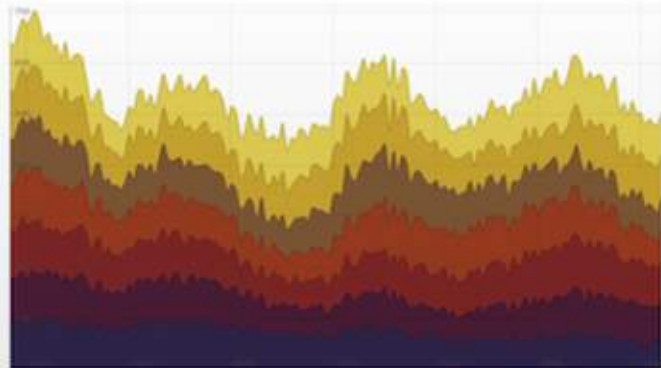

Rickshaw is a JavaScript toolkit for creating interactive time series graphs.

Fork me on GitHub

Vega is a visualization grammar, a declarative format for creating, saving and sharing visualization designs.

With Vega you can describe data visualizations in a JSON format, and generate interactive views using either HTML5 Canvas or SVG.

Read the [tutorial](#), browse the [documentation](#), join the [discussion](#), and explore visualizations using the web-based [Vega Editor](#).

```
{
  "width": 400,
  "height": 200,
  "padding": {"top": 10, "left": 30, "bottom": 20, "right": 10},
  "data": [
    {
      "name": "table",
      "values": [
        {"x": "A", "y": 28}, {"x": "B", "y": 55}, {"x": "C", "y": 43},
        {"x": "D", "y": 91}, {"x": "E", "y": 81}, {"x": "F", "y": 53},
        {"x": "G", "y": 19}, {"x": "H", "y": 87}, {"x": "I", "y": 52}
      ]
    }
  ],
  "scales": [
    {"name": "x", "type": "ordinal", "range": "width", "domain": {"data": "table"}},
    {"name": "y", "range": "height", "nice": true, "domain": {"data": "table"}},
  ],
  "axes": [
    {"type": "x", "scale": "x"},
    {"type": "y", "scale": "y"}
  ],
  "marks": [
    {
      "type": "rect",
      "from": {"data": "table"},
      "properties": {
        "enter": {
          "x": {"scale": "x", "field": "data.x"},
          "width": {"scale": "x", "band": true, "offset": -1},
          "y": {"scale": "y", "field": "data.y"},
          "y2": {"scale": "y", "value": 0}
        },
        "update": { "fill": {"value": "steelblue"} },
        "hover": { "fill": {"value": "red"} }
      }
    }
  ]
}
```

Problem #3

Problem #3

**Information
Architecture**

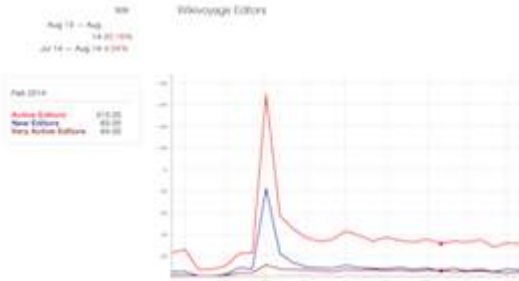

How do you
explore data for
more than 800
projects?

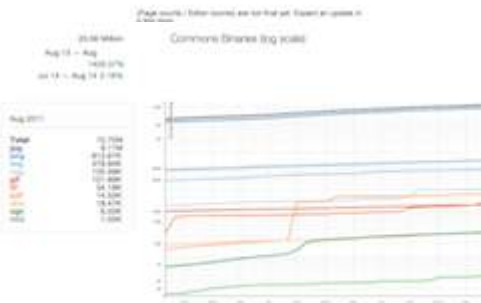

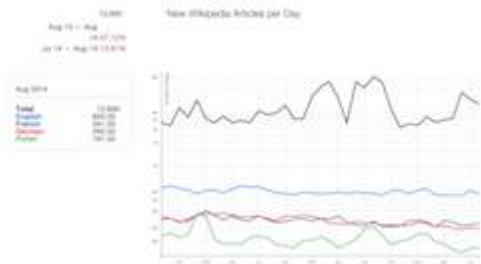

The logo features a central white starburst shape on a red background. The text 'Forever Scrolling' is written in a large, white, cursive font with a black outline, slanted upwards. Below it, a white diagonal banner contains the text 'Creative Digital Experts' in a smaller, black, cursive font.

Forever Scrolling

Creative Digital Experts

**Includes
metadata**

**Data is available
to everyone.**

Why not?...

Server-less

Why not?...

Server-less

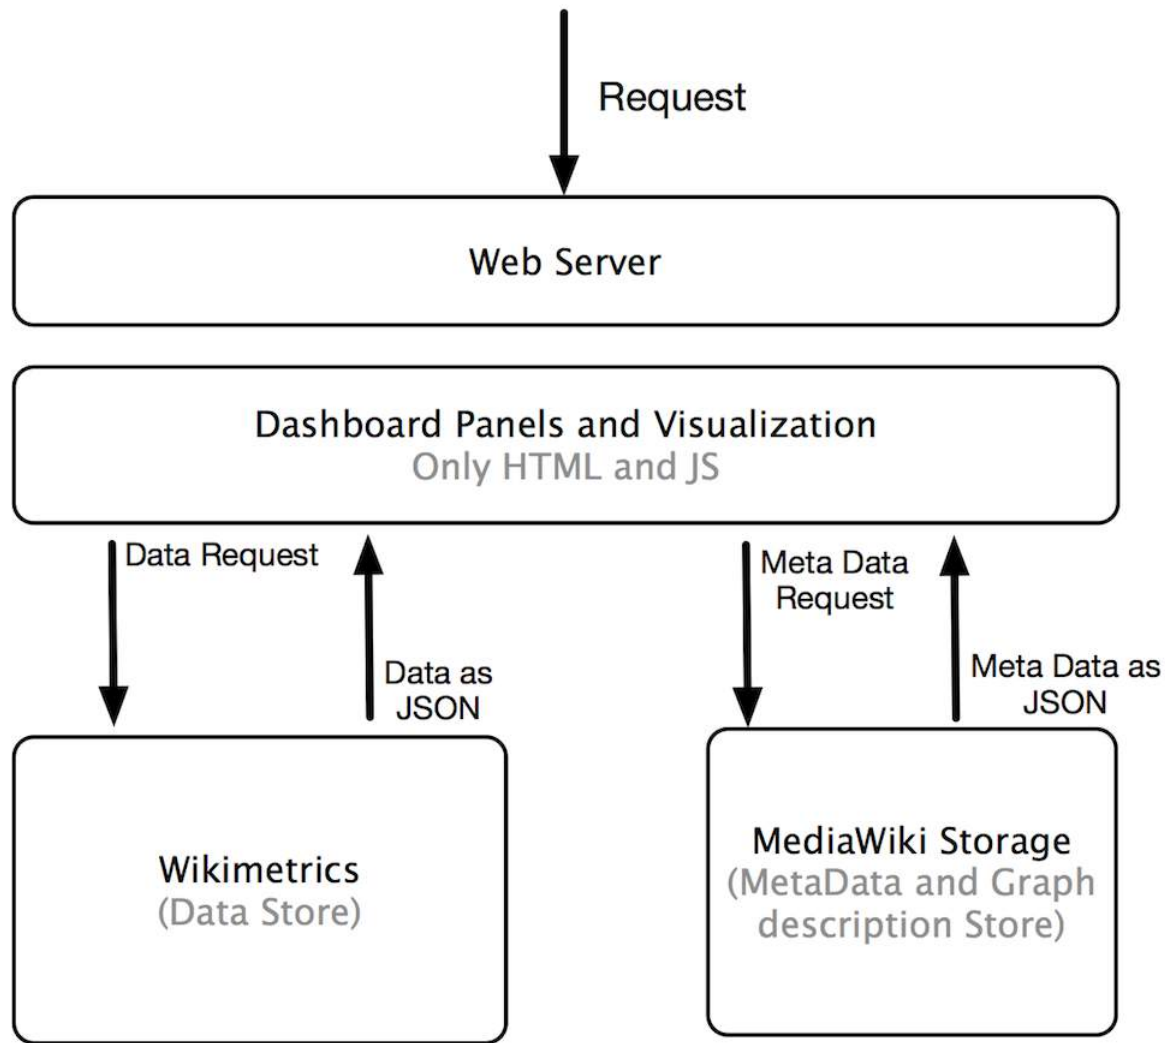

What is the middle
tier for anyways?

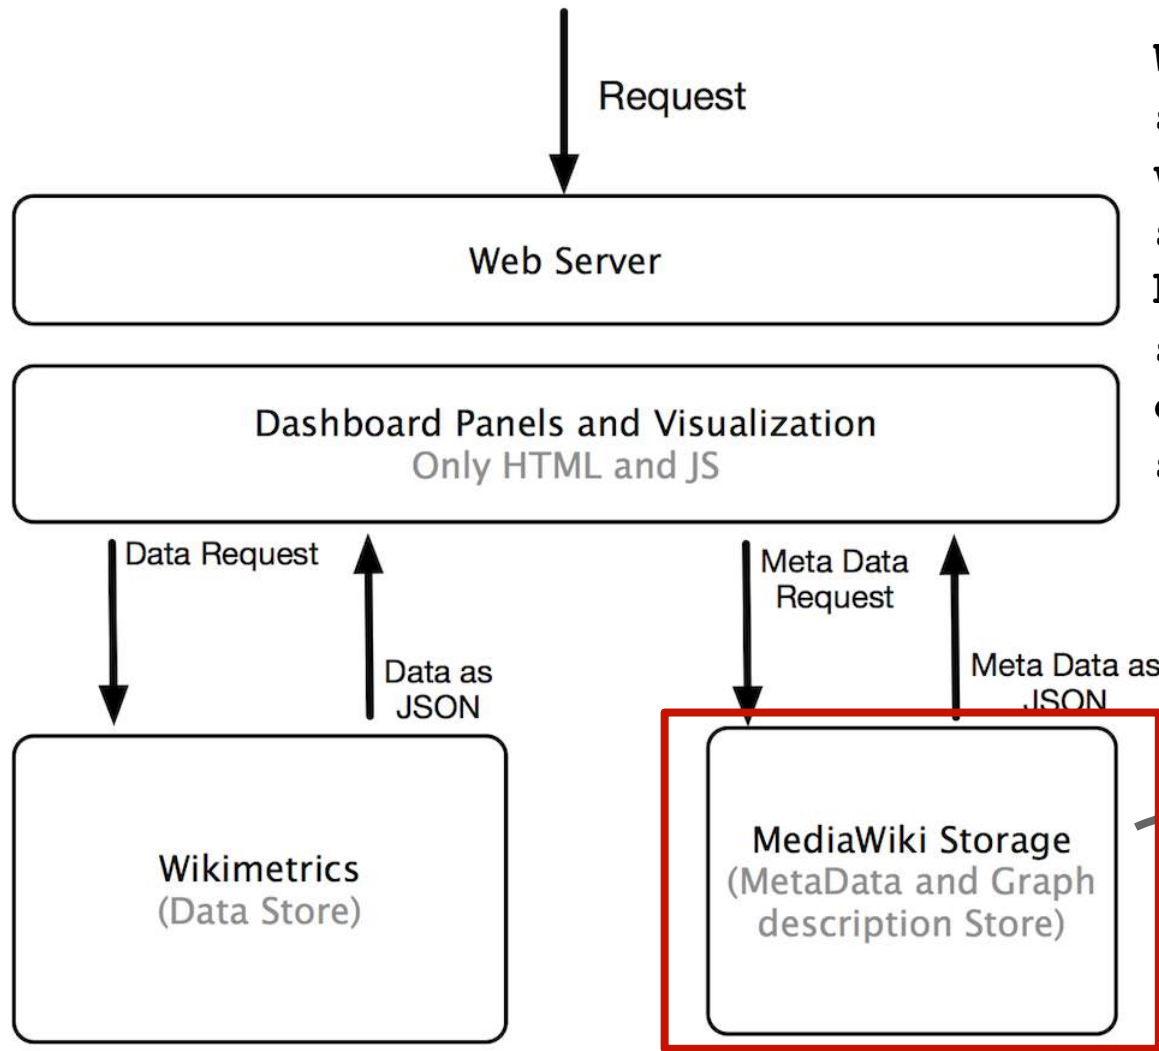

No
authentication
needed

Decouples
visualization
piece from data
gathering piece

Server-less

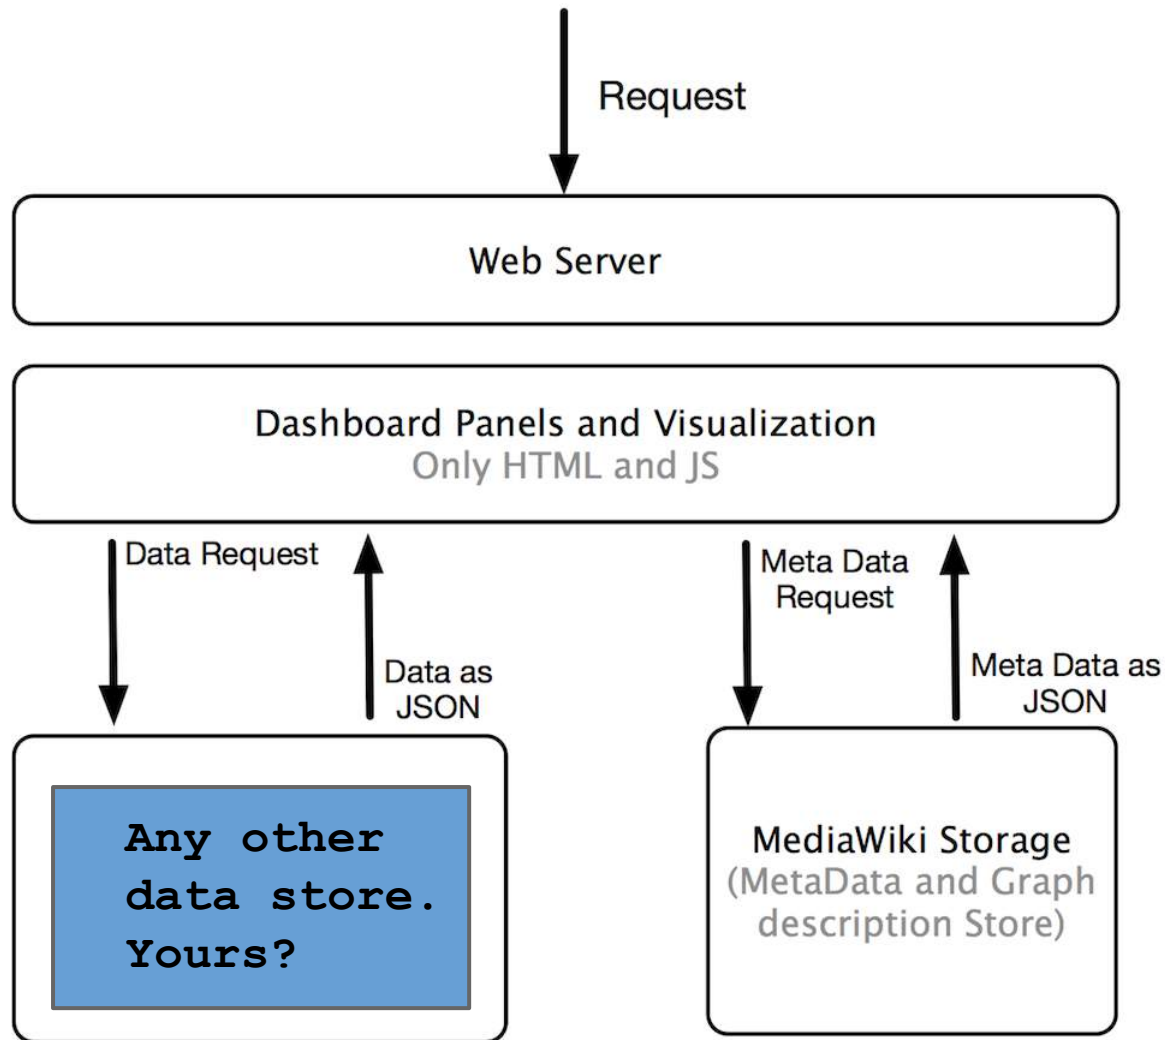

We are server-less, we need to store the bootstrap state of the dashboard somewhere

<https://metrics.wmflabs.org/static/public/dash/>

```
{
  "defaultProjects": [
    "enwiki", "eswiki", "dewiki", "frwiki", "ruwiki",
"jawiki", "itwiki"
  ],
  "defaultMetrics": [
    "RollingActiveEditor", "NewlyRegistered"
  ]
}
```

[intro](#)[config](#)[plus](#)[dev](#)[about](#)[v0.12](#)

|| *On the [AngularJS](#) team, we rely on testing and we always seek better tools to make our life easier. That's why we created Karma - a test runner that fits all our needs.*

[View project on GitHub](#)[npm install karma](#)

Dashiki: a thin wrapper on top of OS technology + information architecture.

We can use **dashiki** to build **other** dashboards.

<https://github.com/wikimedia/analytics-dashiki>

Lessons:

Server-less = Reduced complexity

Easy(est) to deploy

CORS

No error log for now

Bootstrap default state

Keep things simple. No authentication.
